## Abstract

The protective jacket (14, 15) is worn on the user's body. It contains several overlapping and partly shiftable, stabbing resistant, plate-shaped protective members (23a-c), under which is a bullet-proof protection (21, 22) over a shock absorber (19, 20).

Pref. the protector has an articulated arm protections (25, 25a) and leg protections (29, 29a), both with joints (26, 26a). The arm and leg protections are typically of three-quarter sheet cross section with lower extensions. USE/ADVANTAGE - For police and anti-riot personnel, with increased body protection and mobility.
